

## ReadyToTap Payment

for Issuess

STAY IN CONTROL OF YOUR MOBILE PAYMENT STRATEGY AND SERVICES

Our white-label solutions enable you to build your digital payment services simply and quickly!

ReadyToTap<sup>™</sup> Payment offers a complete range of digital payment solutions for banks, card issuers and Fintechs.

Certified by payment schemes, Mastercard, Visa, Cartes Bancaires, and compliant with PCI DSS security standards, our solutions combine a tokenisation hub with a white label mobile wallet and a payment SDK.

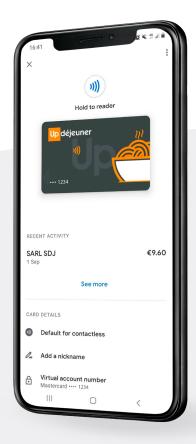

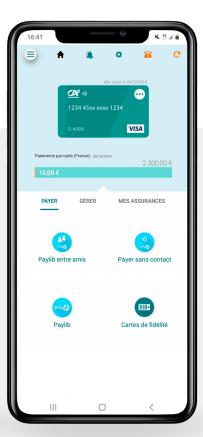

## FLEXIBILITY AND PERFORMANCE

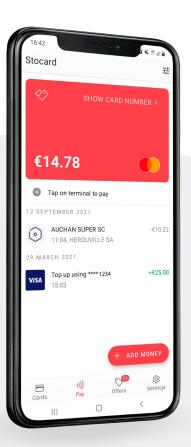

- Offer your customers a complete digital payment service, available on both Android and iOS, via your own Wallet application, using HCE technology on Android, or by integrating with a third-party Wallet (Apple Pay, G-Pay, Samsung Pay, Garmin Pay...).
- Simplify the implementation of your mobile payment services by taking advantage of our certified and secure tokenisation Hub supporting card enrollment, card tokenisation, token life cycle management and much more!
- Our ReadyToTap™ offering includes a wide range of features to give your customers an end-to-end digital payment experience. Our token management module allows your customers to digitize all their cards within any Digital or Merchant wallet, giving them complete control of their tokens.

## LEADER IN SECURE DIGITAL PAYMENT SOLUTIONS

With more than 17 years of experience in NFC and digital payments, and customers in 16 countries worldwide, our solution is amongst the most mature offerings on the market. Serving customers with various profiles (major retail banks, program managers, fintechs...) means we are used to address various use cases; digital gift cards, virtual-only cards, mobile Issuer wallets, OEM Pay wallets, and many others.

Dejamobile is a Fintech providing white-label solutions for digital transaction services including payments, rewards and gifting and mobility.

Dejamobile's solutions enable Issuers, Acquirers, Merchants and Fintechs to succeed in their mobile payment strategy and quickly deploy innovative digital transaction services based on the latest technologies (NFC, HCE, QRCode, tokenization...).
